Note:

i. There are no limitations to represent any given topic in a diagrammatic manner. It is the diagrams and pictures that make a particular topic interactive.

ii. Comprehension based questions from diagrams must be considered as a part of exercise. Students must be able to extract information and judge the situation by observation.

iii. It is a good practice to connect the content with surrounding observation and imbibe in students the concept of interdependence of living beings with one another as well as with the environment.

iv. Innovative suggestions on a particular issue or a topic from students must be promoted in the class. They may not exactly address a given topic, however it is good to involve and motivate students to think and respond with a scientific temperament.

v. Students must be able to classify and compare or differentiate various parallel concepts within the chapter or of different chapters wherever possible.
